

## Passionate and result focused data engineer/business analyst to lead the development of data solutions and infrastructure

Frey is looking for an expert data engineer/business analyst with a passion for database management, cloud storage solutions, BI and analytics to help take our current set-up to the next level. Frey is a young commodity trading company working off a data-driven business model, and here you have the opportunity to take a leading role in developing a scalable foundation and driving results through data and analytics.

We expect that you have the ambition and passion to make a difference, and in turn we promise to offer you plenty of responsibility and empowerment, and to help you grow personally and professionally. You will be joining a team of specialist and competent colleagues within all aspects of the business from data to trading – everyone on a mission to challenge the way agricultural commodities move today - starting with data!

### **Role and Responsibilities** – you will be:

- Identifying data needs across the organisation both short and long term, taking an active role in designing what system architecture and solutions to use
- Developing and maintaining our cloud-based data warehouse solutions, as the foundation and infrastructure for our modelling and trading algorithms and tools
- Utilizing dimensional modelling for optimization purposes
- Hands-on coding the solutions with the team
- Using your capabilities within programming/coding to create new tools and models to improve decision making and optimize processes

### **Expected Skills and Experience** – we expect that you:

- Come with 1-3 years of experience from a similar role and are ready to take the next step in your career increasing your level of influence and responsibility
- Your education is less important, but perhaps you have a background in Computer Science, Software Engineering, Economics, Mathematics or similar
- Have strong analytical skills in fundamental disciplines related to cloud and back-end
- Have significant experience in T-SQL and Power BI/DAX
- Have significant experience in Kimball modelling
- Have knowledge of Microsoft Azure, Power Apps and Power Automate

### **About Frey:**

Frey makes the market for containerized agricultural commodities more efficient and creates opportunities by connecting a data-driven trading mindset to a world-class infrastructure and logistics expertise. Frey is a venture owned by Maersk Growth.

Job start will be as soon as possible. We will be screening candidates on an ongoing basis.

If you have any questions for the position, please contact Jeff Løcke Laursen (+45 5114 6695 or [jll@freycommodities.com](mailto:jll@freycommodities.com)) for more information. Please send you application, including cover letter and CV, to: [job@freycommodities.com](mailto:job@freycommodities.com), marked "Data Engineer".
